DEADBAND NOTES	
The deadbands listed in the tables are the maximum switch differentials when the standard (Type "2" or Type "5") electric switch is used.	
Deadband is affected by the type of switch used. Each type of switch's effect on deadband is as follows:	
Type "1"	- Low Deadband - Use ½ TYPE 2 table values.
Type "2"	- Std. Deadband - Use table values.
Type "3"	- High DC Rated - Multiply TYPE 2 table values by two.
Type "5"	- Sub Miniature - 2 S.P.D.T. - Use TYPE 5 table values.
Type "6"	- Gold Contact - Use TYPE 2 table values.

Please note that Type "5" is the only available option on 2WPS Switches that require two Electric Switches.

**DEADBAND NOTES**

The deadbands listed in the tables are the maximum switch differentials when the Type "1" or Type "2" electric switch is used.

Deadband is affected by the type of electric switch used. Each type of electric switch's effect on deadband is as follows:

Type "1" - Low Deadband - Use table values.

Type "2" - Std. Deadband - Use table values.

Type "3" - High DC Rated - Multiply TYPE 2 table values by two.

Type "4" - Hermetically Sealed Switch - Multiply TYPE 2 table values by six.

Type "6" - Gold Contact - Use TYPE 2 table values.
